DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-27, and 43, drawn to a method for determining depth of a volume comprising a fluorophore in a turbid medium using time domain (TD) optical fluorescence.

Group II, claim(s) 28-42, drawn to AN apparatus for determining depth and concentration of a fluorophore in a turbid medium comprised within an object.

The method of Group I can be accomplished with an apparatus that does not contain a "second detector channel in a trans-illumination geometry relative to said source channel, to measure an emission intensity of said fluorophore," which is a limitation of claim 28 in Group II.
